Wyoming State Geological Survey
Thomas A. Drean, Director and State Geologist

Bear River Basin Water Plan Update
Groundwater Study
Level I (2010 – 2014)

Available Groundwater Determination
Technical Memorandum No. 6

by

Karl G. Taboga, Timothy T. Bartos, Paul Taucher, Laura L. Hallberg,
Melanie L. Clark, James Stafford, Tomas Gracias and Seth J. Wittke

Chapter 1 1-1
1.1 Interagency Agreement and scope 1-2
1.2 Agency participation 1-5
1.3 Legal and institutional framework 1-6
1.3.1 Wyoming water law – groundwater appropriation, development, and use 1-6
1.3.2 Interstate agreements 1-7
1.3.3 Wyoming water law – groundwater quality 1-8
1.3.4 Other agencies 1-8
1.4 Authorship 1-9
1.5 Acknowledgements 1-9

Chapter 2 2-11
2.1 Sources of data 2-12
2.2 Previous regional-scale investigations 2-12
2.3 Current WWDC and USGS regional-scale investigations 2-16
2.4 Current Available Groundwater Determination 2-16
2.5 Maps 2-16

Chapter 3 3-19
3.1 Physiography, landforms, topography, and surface drainage 3-20
3.2 Climate, precipitation, and vegetation 3-23
3.3 Population distribution, land use, and land ownership 3-23

Chapter 4 4-27
4.1 General geologic history 4-28
4.2 Structural geology 4-28
4.3 The Thrust Belt 4-30
4.3.1 Paris-Willard Thrust System 4-30
4.3.2 Meade-Laketown Thrust System 4-30
4.3.3 Crawford Thrust System 4-30
4.3.4 Absaroka Thrust System 4-30
4.3.5 Darby Thrust System 4-31
4.4 Uinta Mountains 4-31
4.5 Mineral resources 4-31

Chapter 5 5-39
5.1 Definitions and concepts 5-40
5.1.1 Definitions 5-40
5.1.2 Types of groundwater flow 5-44
5.1.3 Groundwater recharge, discharge, and flow 5-45
5.1.3.1 Groundwater recharge 5-45
5.1.3.2 Groundwater discharge 5-48
5.1.3.3 Groundwater flow 5-48
5.1.4 Groundwater storage, safe yield, and sustainable development 5-50
5.1.4.1 Groundwater storage 5-50
5.1.4.2 Safe yield 5-51
5.1.4.3 Sustainable development 5-53

5.2 Map/rock units: geologic, stratigraphic, and hydrogeologic 5-55
5.3 Wyoming statewide aquifer classification system 5-57
5.4 Groundwater circulation in the Bear River Basin 5-59
5.4.1 Groundwater circulation in Quaternary aquifers 5-59
5.4.2 Groundwater circulation in post-Hilliard aquifers 5-59
5.4.3 Groundwater circulation in pre-Hilliard aquifers 5-59
5.4.4 Influence of Thrust Belt structure on groundwater circulation 5-60
5.5 Natural groundwater quality and hydrogeochemistry 5-60
5.5.1 Groundwater quality 5-61
5.5.1.1 Standards of groundwater quality 5-62
5.5.1.2 Sources, screening, and selection of data 5-63
5.5.1.3 Water quality characteristics 5-64
5.5.1.4 Statistical analysis 5-65
5.5.1.4.1 Environmental water samples 5-68
5.5.1.4.2 Produced-water samples 5-69
5.5.1.5 Trilinear diagrams 5-70
5.6 Aquifer sensitivity and potential groundwater contaminant sources 5-70
5.6.1 The Wyoming Groundwater Vulnerability Assessment Handbook 5-71
5.6.2 Potential sources of groundwater contamination 5-72
5.6.3 Discussion 5-83
5.6.4 Source Water Assessment, Wyoming Water Quality Monitoring, and other programs 5-85
The Source Water Assessment Program (SWAP) 5-85
Water Quality Monitoring Strategy 5-86
Phase I – Aquifer prioritization 5-86
Phases II and III – Groundwater monitoring plan design, implementation, and assessment 5-86
Phase IV – Education and outreach for local groundwater protection efforts 5-88
USGS Pesticide Monitoring Program in Wyoming 5-88
WDEQ Nonpoint Source Program 5-88

Chapter 6 6-89
6.1 Hydrostratigraphy and recharge to aquifer outcrop areas 6-90
6.2 Average annual recharge 6-91
6.3 Summary 6-100

Chapter 7 7-103
7.1 Bear River Basin 7-104
7.2 Cenozoic hydrogeologic units 7-104
7.2.1 Quaternary unconsolidated-deposit aquifers 7-104
Physical characteristics 7-104
Recharge, discharge, and groundwater movement 7-107
Cokeville area groundwater-flow model 7-109
Evanston area streamflow depletion study 7-110
Chemical characteristics 7-110
7.2.1.1 Quaternary alluvial aquifers 7-110
7.2.1.2 Quaternary terrace-deposit aquifers 7-110
7.2.1.3 Aquifers in Quaternary landslide deposits 7-111

7.2.2 Tertiary hydrogeologic units 7-111
7.2.2.1 Salt Lake aquifer 7-111
7.2.2.2 Bishop Conglomerate 7-112
7.2.2.3 Fowkes aquifer 7-112
Physical characteristics 7-112
Chemical characteristics 7-113
7.2.2.4 Conglomerate of Sublette Range 7-114
7.2.2.5 Green River aquifer and confining unit 7-114
Physical characteristics 7-114
Chemical characteristics 7-115
7.2.2.6 Wasatch aquifer 7-115
Physical characteristics 7-115
Chemical characteristics 7-117
7.2.2.7 Evanston aquifer 7-118
Physical characteristics 7-118
Chemical characteristics 7-119
7.3 Mesozoic Hydrogeologic Units 7-120
7.3.1 Adaville aquifer 7-120
7.3.2 Hilliard confining unit 7-121
7.3.3 Frontier aquifer 7-121
Physical characteristics 7-121
Chemical characteristics 7-122
7.3.4 Sage Junction Formation 7-123
Physical characteristics 7-123
Chemical characteristics 7-123
7.3.5 Aspen confining unit 7-123
Physical characteristics 7-123
Chemical characteristics 7-124
7.3.6 Wayan Formation 7-124
7.3.7 Quealy Formation 7-124
7.3.8 Cokeville Formation 7-124
7.3.9 Bear River aquifer 7-125
Physical characteristics 7-125
Chemical characteristics 7-125
7.3.10 Thomas Fork aquifer 7-125
Physical characteristics 7-126
Chemical characteristics 7-127
7.3.11 Smiths Formation 7-127
7.3.12 Gannett aquifer and confining unit 7-127
Physical characteristics 7-127
Chemical characteristics 7-128
7.3.13 Stump Formation 7-129
7.3.14 Preuss Sandstone or Redbeds 7-130
Physical characteristics 7-130
Chemical characteristics 7-130

7.3.15 Twin Creek aquifer 7-130
Physical characteristics 7-130
Chemical characteristics 7-132
7.3.16 Nugget aquifer 7-133
Physical characteristics 7-133
Chemical characteristics 7-134
7.3.17 Ankareh aquifer 7-135
7.3.18 Thaynes aquifer 7-135
Physical characteristics 7-136
Chemical characteristics 7-137
7.3.19 Woodside confining unit 7-137
Physical characteristics 7-137
Chemical characteristics 7-138
7.3.20 Dinwoody aquifer and confining unit 7-138
7.4 Paleozoic hydrogeologic units 7-139
7.4.1 Phosphoria aquifer 7-140
Physical characteristics 7-140
Chemical characteristics 7-140
7.4.2 Wells aquifer 7-141
Physical characteristics 7-141
Chemical characteristics 7-141
7.4.3 Amsden aquifer 7-142
7.4.4 Madison aquifer 7-143
Physical characteristics 7-143
Chemical characteristics 7-143
7.4.5 Darby aquifer 7-144
7.4.6 Laketown Dolomite 7-145
7.4.7 Bighorn aquifer 7-145
Physical characteristics 7-145
Chemical characteristics 7-145
7.4.8 Gallatin aquifer 7-146
7.4.9 Gros Ventre confining unit 7-146
7.4.10 Flathead aquifer 7-147
7.5 Precambrian basal confining unit 7-147

Chapter 8 8-149
8.1 Information from previous water plans 8-151
8.2 Groundwater withdrawal and consumptive use estimations and basin-wide water balance 8-151
8.2.1 Groundwater withdrawal and consumptive use estimations 8-151
8.3 Basin-wide water balance 8-155
8.3.1 Precipitation 8-155
8.3.2 Surface water inflows and outflows 8-155
8.3.3 Evaporation from reservoirs 8-155
8.3.4 Depletions from municipal/domestic, livestock, and industrial uses) 8-155
8.3.5 Total estimated Bear River Basin recharge 8-156
8.3.6 Estimated basin-wide evapotranspiration 8-156

8.4 Magnitude, origin and fate of water resources in the Bear River Basin 8-157
8.5 Groundwater withdrawals by use 8-158
8.5.1 Irrigation 8-159
8.5.2 Livestock watering 8-159
8.5.3 Municipal/community public water systems 8-159
8.5.4 Rural domestic use 8-160
8.5.5 Combined municipal and domestic withdrawals and consumptive use 8-160
8.5.6 Recreational and environmental uses 8-160
8.5.7 Industrial uses 8-161
8.6 Information from hydrogeologic unit studies 8-162
8.7 Groundwater permit information 8-162
8.7.1 Groundwater permits by permit status 8-163
8.7.2 Groundwater permits by depth and yield 8-163
8.7.3 Groundwater permits by use: tables, figures, and matrix tables 8-164
8.7.3.1 Groundwater permits by use: Tables 8-6, through 8-11 8-166
8.7.3.2 Groundwater permit location maps and matrix tables, by use 8-166
8.7.3.3 Irrigation use permits (Figure 8-1) 8-168
8.7.3.4 Livestock use permits (Figure 8-2) 8-168
8.7.3.5 SEO municipal use permits (Figure 8-3) 8-168
8.7.3.6 Domestic use permits (Figure 8-4) 8-172
8.7.3.7 Source Water Assessment Program (SWAP) wells and springs 8-174
8.7.3.8 Industrial use and CBNG permits 8-174
8.7.3.8.1 Groundwater use for oil and gas production 8-175
8.7.3.8.2 Groundwater use for coal mining 8-177
8.7.3.8.3 Groundwater use for non-energy minerals development 8-177
8.7.3.9 Monitoring wells (Figure 8-5) 8-177
8.7.3.10 Permits for other and miscellaneous uses (Figure 8-6) 8-177
8.7.3.11 Hydrothermal use 8-180
8.8 Groundwater interference/interconnection with surface water 8-180
8.8.1 Interference between wells 8-180
8.8.2 Interconnection between groundwater and surface water 8-180

Chapter 9 9-183
9.1 Issues affecting future groundwater development 9-184
9.1.1 Groundwater development potential in areas subject to the Amended Bear River Compact of 1978 9-186
9.1.2 Future water use opportunities 9-186
9.1.3 Potential new groundwater development prospects 9-187
9.1.4 Recent WWDC groundwater development prospects 9-187
9.1.4.1 North Uinta 9-187
9.1.4.2 Evanston/Bear River regional water system 9-188
9.1.5 Current WWDC and SEO projects 9-189
9.1.6 Groundwater interference and interconnection with surface water 9-189
9.2 Recommendations for future updates 9-189
9.2.1 Data challenges 9-189
9.2.2 Current and future research efforts 9-190

LIST OF PLATES

(Paper and/or DVD copies contained in back cover pocket)

Plate 1. Bedrock geology of Bear River Basin, Wyoming, Utah and Idaho.
Plate 2. Hydrogeology of Bear River Basin, Wyoming, Utah and Idaho.
Plate 3. Location of springs, wells, and associated physical and chemical characteristics, and generalized geology, Bear River Basin, Wyoming.
Plate 4. Summaries of spring discharge, well yield, and hydraulic properties, Bear River Basin, Wyoming.
Plate 5. Relation of lithostratigraphic units to hydrogeologic units, Overthrust Belt and Fossil Basin, including Bear River Basin, Wyoming.
Plate 6. Potentiometric surface of the Bear River alluvial aquifer (modified from Glover, 1990) and generalized geology in the Cokeville area, Wyoming.
