

*Next stop on the ABCs tour of Wyoming's geologic wonders ...*

## ***Red beds***

- ***Sedimentary rock units that are red due to the presence of ferric oxides***
- ***Chugwater Formation is classic example in Wyoming***
- ***Red beds can be seen near Lander, Lovell, Thermopolis, & Sundance, among other areas***

***Photos by: WSGS geologists  
Wayne Sutherland,  
Jacob Carnes, Robert Gregory  
& Andrea Loveland***

*Interpreting the past,  
providing for the future*
