

# GEOLOGIC MAP OF SNOWBIRD MINE, SOUTH PASS, WY.

by  
W. Dan Hausel  
&  
Jon K. King  
1985

- Snowbird vein. Northern portion dominated by two generations of quartz with sulfides (principally pyrite, trace chalcopyrite) and minor calcite. Southern portion dominated by calcite.
- Quartz vein.
- Shear Zone showing dip
- Meta-basalt (mafic amphibolite). Tholeiitic composition.
- Meta-andesite - metadacite. Calc-alkaline.
- Metagreywacke.
- Mixed member. Mixed metagreywacke with interbedded amphibolite and metabasalt.
- Caved & filled drifts.
- Raise, chevrons in direction of decline.
- Timber.
